Cooking Instructions

To prepare your Kansas City Steak Company twice-baked potatoes, follow these easy instructions. You can choose to bake them in the oven or heat them in the microwave, depending on your preference and time constraints.

Oven Cooking Method

1. Preheat the Oven: Start by preheating your oven to 375°F (190°C). This step is crucial for

ensuring even cooking and a crispy exterior.

2. Remove from Packaging: Take the twice-baked potatoes out of their packaging. If they are frozen, there is no need to thaw them; they can go directly from the freezer to the oven.

3. Place on Baking Sheet: Arrange the potatoes on a baking sheet. This will catch any drippings and make for easier cleanup.

4. Bake the Potatoes: Place the baking sheet in the preheated oven. Bake for about 30-35 minutes if they are thawed, or 45-50 minutes if they are frozen. The potatoes are done when they are heated through and the tops are golden brown.

5. Check for Doneness: To ensure they are thoroughly heated, you can insert a thermometer into the center of a potato; it should read at least 165°F (74°C).

6. Serve: Once cooked, remove the potatoes from the oven. Allow them to cool for a few minutes before serving. This will help prevent burns and allow the flavors to settle.

Microwave Cooking Method

If you're short on time, you can also cook the twice-baked potatoes in the microwave.

1. Remove from Packaging: Just like with the oven method, remove the potatoes from their packaging.

2. Place on Microwave-Safe Dish: Put the potatoes on a microwave-safe plate. Ensure they are spaced out to allow even heating.

3. Microwave: Heat on high for 6-8 minutes if they are thawed, or 10-12 minutes if they are frozen. Cooking times may vary based on your microwave's wattage, so adjust accordingly.

4. Check for Doneness: Similar to the oven method, check the internal temperature to ensure it reaches 165°F (74°C).

5. Serve: Let the potatoes sit for a minute before serving, as they will be hot.
