4. Every 400 hours or every two years:
 - Replace coolant
 - Inspect the entire electrical system
 - Perform a complete brake system inspection

Common Troubleshooting Tips

Even with proper maintenance, issues can arise with the Kawasaki Teryx 750. The service manual provides troubleshooting tips for common problems:

Starting Issues

- Check the Battery: Ensure that the battery is charged and terminals are clean.
- Inspect the Kill Switch: Confirm that the kill switch is in the "Run" position.
- Examine Fuses: A blown fuse may prevent the vehicle from starting.

Overheating

- Check Coolant Levels: Low coolant can lead to overheating; refill as necessary.
- Inspect Radiator and Hoses: Look for leaks or blockages in the cooling system.
- Verify Fan Operation: Ensure that the cooling fan is functioning properly.

No Power to Accessories

- Inspect Fuses: A blown fuse could be the culprit for loss of power to accessories.
- Check Wiring: Look for loose or damaged wiring connections.
