Detailed Breakdown of Kewanee 1010 Disc Parts

The Kewanee 1010 disc parts manual provides an exhaustive listing and description of each component that makes up the disc harrow. This detailed breakdown is invaluable for identifying parts during inspection, ordering replacements, or performing repairs.

Disc Blades

Disc blades are the primary working elements of the harrow. Made from high-carbon steel, they are concave and designed to cut through soil and crop residue efficiently. Proper blade selection and maintenance ensure optimal soil turnover and minimal wear.

Gangs and Gang Assemblies

The gangs are assemblies that hold and support the disc blades in a set configuration. Each gang is mounted on an axle and can be adjusted for the desired angle to control soil penetration depth and aggressiveness.

Bearings and Hubs

Bearings support the rotational movement of the gangs and discs. The hubs connect the discs to the axle. High-quality bearings and hubs are crucial for smooth operation and to prevent premature wear or failure.

Frame and Hitch Components

The frame forms the backbone of the harrow, supporting all other parts. It is built from heavy-duty steel to resist bending and breaking under field stress. The hitch assembly connects the harrow securely to the tractor, ensuring safe and effective operation.

Scrapers and Other Accessories

Scrapers prevent soil buildup on the disc blades, maintaining effective operation. Other accessories may include depth control mechanisms, grease fittings, and safety chains, all detailed in the parts manual.

Maintenance and Repair Guidelines

Regular maintenance is critical to maximize the lifespan and performance of the Kewanee 1010 disc harrow. The parts manual includes recommended maintenance schedules and repair procedures tailored to each component.

Routine Inspection

Inspecting the harrow before and after use can identify worn or damaged parts early. Key inspection points include checking disc blade sharpness, gang alignment, bearing condition, and frame integrity.

Lubrication and Cleaning
