These early translations were often met with resistance due to religious and political concerns, as well as linguistic challenges.

John Wycliffe and the First English Bible

In the late 14th century, John Wycliffe produced one of the first complete English translations of the Bible. Wycliffe's translation was based on the Latin Vulgate and was handwritten, as the printing press had not yet been invented. His work was controversial, leading to opposition from church authorities who feared the spread of unauthorized interpretations of scripture.

William Tyndale's Translation Efforts

The goal was to create a Bible that was both accurate and majestic in language, suitable for public reading and worship.

Selection of Translators
