Installation Guide

Installing the Kwikset Model 450 191 is straightforward and can typically be completed in under an hour. Below is a step-by-step guide to help you through the installation process.

Tools Required

Before you begin, gather the following tools:

- Phillips screwdriver
- Flathead screwdriver
- Tape measure
- Drill (if installing on a new door)
- Chisel (if necessary for the strike plate)

Step-by-Step Installation Process

1. Prepare the Door: Ensure the door is properly hung and that the existing holes for the lock are aligned.
2. Mark the Position: Measure and mark the center of the door for the deadbolt installation. The center of the lock should typically be 36 inches from the floor.
3. Drill the Holes: If your door does not have existing holes, use a hole saw to drill a 2-1/8 inch hole for the lock cylinder and a 1-inch hole for the latch.
4. Install the Latch: Insert the latch into the edge of the door. Use a chisel to ensure a snug fit if necessary. Secure it with screws.
5. Install the Deadbolt Assembly:
 - Insert the exterior cylinder through the hole from the outside of the door.
 - Align the interior thumb turn with the cylinder and secure it with screws.
6. Install the Strike Plate: Mark the location for the strike plate on the door frame. Drill a hole and chisel out the area if needed. Attach the strike plate with screws.
7. Test the Lock: Ensure the deadbolt operates smoothly by turning the thumb turn and using the key from the outside.

Operating Instructions

Using the Kwikset Model 450 191 is simple. Here's how to operate it:

Locking and Unlocking

- To Lock: Turn the thumb turn on the inside to engage the deadbolt. From the outside, insert the key and turn it to lock the door securely.
- To Unlock: Use the key from the outside or turn the thumb turn from the inside to unlock the door.

Changing the Key

If you need to change the key for your deadbolt, you can do so by following these steps:

1. Remove the Lock: Unscrew the interior assembly and pull it away from the door.
2. Locate the Reset Button: Find the reset button on the side of the lock cylinder.
3. Insert the New Key: While pressing the reset button, insert the new key and turn it to the "lock" position.
4. Release the Button: Remove the key and reassemble the lock.

Maintenance Tips

To ensure the longevity and functionality of your Kwikset Model 450 191 deadbolt, follow these maintenance tips:

- Regular Lubrication: Apply a silicone-based lubricant to the keyway and moving parts at least once a year.
- Check for Wear: Inspect the lock for any signs of wear or damage, particularly after severe weather.
- Clean the Exterior: Wipe down the exterior with a damp cloth to remove dirt and debris, especially in high-traffic areas.

Troubleshooting Common Issues

Even with careful installation and maintenance, you may encounter some common issues with the Kwikset Model 450 191. Here are some troubleshooting tips:

Lock Won't Turn

- Check the Key: Ensure you are using the correct key. A worn or damaged key may not work properly.
- Inspect the Cylinder: If the lock is sticking, apply lubricant to the keyway and try again.

Deadbolt Doesn't Fully Extend or Retract

- Misalignment: Check if the strike plate is aligned with the deadbolt. Adjust the plate if necessary.
- Debris: Ensure there is no debris obstructing the deadbolt's path. Clean the area around the lock.

Lock is Sticking

- Lubrication: Apply lubricant to the moving parts of the lock. If the problem persists, you may need to disassemble and clean the lock.
