Installation Instructions

Installing the Kwikset SmartCode 917 is a straightforward process that can be completed in a few steps. Before you begin, make sure you have the necessary tools, including a screwdriver, a tape measure, and the lock installation template provided in the package.

Step-by-Step Installation Guide

1. Prepare the Door

- Ensure your door is at least 1-3/8 inches thick and that it has the appropriate hole sizes for the lock.
- If you're replacing an existing lock, remove it and clean the area.

2. Install the Latch

- Insert the latch into the edge of the door and ensure it's aligned properly.
- Secure the latch with screws provided in the kit.

3. Attach the Exterior Assembly

- Position the exterior part of the lock (keypad side) against the door, aligning it with the latch.
- Insert the mounting screws through the exterior assembly into the door.

4. Install the Interior Assembly

- Attach the interior part of the lock (the side with the thumb turn) by aligning it with the exterior assembly.
- Secure it in place with the provided screws.

5. Insert the Batteries

- Open the battery compartment located on the interior assembly and insert four AA batteries.
- Make sure the batteries are oriented correctly.

6. Test the Lock

- Before finalizing the installation, test the lock by entering the default code and ensure it locks and unlocks smoothly.

Programming Your SmartCode 917

Once the installation is complete, the next step is to program your Kwikset SmartCode 917 to suit your security needs.

Default Programming Code

The lock comes with a default programming code, typically found in the manual. Make sure to change this code upon installation to maintain security.

How to Program User Codes

To program user codes, follow these steps:

1. Enter Programming Mode

- Press the "Program" button on the interior assembly. You will hear a beep, indicating that you are in programming mode.

2. Enter the Default Code

- Input the default programming code followed by the "Lock" button. You should hear a beep if the code is accepted.

3. Add a User Code

- Enter the new user code (4-8 digits) and press the "Lock" button. You should hear two beeps confirming the code has been added.

4. Test the User Code

- Exit programming mode and test the new user code to ensure it works properly.

5. Repeat for Additional Codes

- You can program up to 30 unique user codes by repeating the above steps.

Troubleshooting Common Issues

Even with its advanced technology, users may encounter issues with the SmartCode 917. Below are some common problems and their solutions.

Lock Does Not Respond

- Check Battery: Ensure the batteries are installed correctly and have enough charge. Replace if necessary.
- Reset the Lock: If the lock continues to be unresponsive, perform a factory reset by following the reset instructions in the manual.

Programming Errors

- Incorrect Code Entry: Double-check that you are entering the correct default programming code.
- Code Length: Ensure that user codes are between 4-8 digits.

Lock Not Securing Properly

- Misalignment: Make sure the lock and latch are aligned properly. You may need to adjust the strike plate or the latch itself.
- Debris: Check for any debris or obstructions in the lock mechanism that may hinder operation.

Maintenance and Care

To ensure the longevity and effectiveness of your Kwikset SmartCode 917, regular maintenance is recommended.

Regular Cleaning

- Exterior: Wipe down the exterior keypad with a damp cloth to remove dust and grime.
- Interior: Dust the interior assembly to prevent buildup that could affect the locking mechanism.

Battery Replacement

- Schedule Regular Checks: Regularly check the battery status, especially before periods of heavy use or travel.
- Use Quality Batteries: Opt for reputable brand batteries to ensure the lock functions effectively.

Rekeying the Lock

If you wish to enhance security after a change in occupancy or after losing a key, utilize the SmartKey feature to rekey the lock quickly. Instructions for this process are included in the manual.
