The game combines stealth, puzzle-solving, and platforming elements, requiring players to be observant and strategic. Players control Mono, a young boy equipped with a paper bag mask, who is accompanied by Six, the protagonist from the first game. The controls are designed to be intuitive, allowing players to run, jump, grab, push, pull, and interact with objects in the environment.

Basic Controls

The basic control scheme includes movement with the analog stick or keyboard keys, jumping to navigate platforms, and interacting with objects or characters by pressing the action button. Players can also crouch to avoid detection or squeeze through tight spaces. Mastering these controls is essential for progressing through each chapter's challenges.

Mono and Six must often cooperate to solve puzzles and bypass obstacles. Six can be controlled directly in certain sections or given commands to follow or wait. Players should use this dynamic to their advantage, coordinating actions between the two characters to advance.
