1. Planning

Planning is the first step in the management process, involving the setting of objectives and determining a course of action to achieve them. Prasad emphasizes the importance of having a clear vision and mission, which guides decision-making. Key components of effective planning include:

- Goal Setting: Establishing SMART (Specific, Measurable, Achievable, Relevant, Time-bound) goals is crucial for clarity and direction.
- Forecasting: Predicting future trends and preparing for potential challenges helps organizations stay ahead.
- Resource Allocation: Efficient distribution of resources ensures that all departments have what they need to succeed.

2. Organizing
