Setting Up the Logitech MX Master 3S

Setting up the MX Master 3S is a straightforward process. Follow these steps to get started:

Step 1: Charge the Mouse

Before using the mouse, it is recommended to charge it. The MX Master 3S uses a USB-C charging cable. Connect the cable to the mouse and plug the other end into a USB port on your computer or a wall adapter. A full charge typically takes about 2 hours.

Step 2: Connect the Mouse

You have two options to connect your MX Master 3S: via Bluetooth or using the Unifying receiver.

- Using Bluetooth:

1. Turn on the mouse using the switch located on the bottom.
2. Press and hold the Easy-Switch button until the LED starts blinking.
3. On your computer, go to Bluetooth settings and search for devices.
4. Select "MX Master 3S" from the list and click "Connect."

- Using the Unifying Receiver:

1. Plug the Unifying receiver into a USB port on your computer.
2. The mouse should connect automatically. If not, follow the same steps as in the Bluetooth connection method.

Step 3: Install Logitech Options Software

To customize your MX Master 3S and access all of its features, download and install the Logitech Options software from the Logitech website. This software allows you to:

- Adjust DPI settings
- Customize button functions
- Set up gestures
- Manage multiple devices

Key Features of the Logitech MX Master 3S

The MX Master 3S is packed with features that cater to the needs of professionals. Below are some of the highlights:

Ergonomic Design

The MX Master 3S is designed to fit comfortably in your hand, reducing strain

during prolonged use. The sculpted shape accommodates your hand's natural position, providing support for your fingers and thumb.

Advanced Tracking Technology

The Darkfield High Precision sensor allows the MX Master 3S to track on virtually any surface, including glass. With a DPI range of up to 8000, you can adjust sensitivity according to your preference.

Customizable Buttons

The mouse features six programmable buttons that can be customized through the Logitech Options software. You can assign various functions, such as shortcuts for applications, copy/paste commands, or even macros for repetitive tasks.

Seamless Multi-Device Control

One standout feature of the MX Master 3S is its ability to switch between three devices effortlessly. By pressing the Easy-Switch button, you can quickly toggle between connected devices, making it ideal for users who work across multiple computers.

MagSpeed Scroll Wheel

The MagSpeed scroll wheel offers fast, precise scrolling. It can switch between ratchet and hyper-fast scrolling modes, allowing you to scroll through long documents or web pages quickly.

Quick Charge Functionality
