Types of Logic Games

The Logic Games can be categorized into three main types:

1. **Sequencing Games:** These games require you to arrange items in a specific order based on given rules. For example, you might need to arrange students in a lineup based on their grades.
2. **Grouping Games:** In these games, you categorize items into different groups. You might be asked to assign students to various clubs based on certain criteria.
3. **Combination Games:** These games often involve both sequencing and grouping elements, requiring a more complex understanding of the relationships among items.

Understanding these types of games is fundamental for developing effective strategies to tackle them.
