Utilize Malone's load assist accessories if available to reduce strain and risk of injury.

Securing the Kayak

Follow these steps to secure the kayak effectively:

1. Attach the bow and stern tie-down straps to secure the kayak to the vehicle's front and rear anchor points.
2. Use the rack's cam straps or ratchet straps to fasten the kayak firmly to the cradles.
3. Ensure straps are tight but not overly constrictive to avoid damaging the kayak hull.
4. Double-check all connections before driving.

Regularly inspect straps during long trips to maintain tightness and security.
