Drafting Strategies

Drafting is an art form that combines knowledge of cards, understanding of synergies, and adaptability. Here are several essential strategies to consider while drafting Modern Horizons 2.

1. Familiarize Yourself with Archetypes

Understanding the available archetypes is crucial for a successful draft. Modern Horizons 2 features several distinct archetypes, each with its own strengths and weaknesses. Here are some key archetypes to consider:

- **Blue-Red (Izzet) Spells:** Focused on instants and sorceries, this archetype benefits from cards that

generate card advantage and burn spells.

- White-Black (Orzhov) Lifegain: This archetype revolves around gaining life and using that life to fuel powerful effects or cards.
- Green-Red (Gruul) Creatures: Emphasizing aggressive creature strategies, this archetype often includes powerful creatures that can dominate the board early.
- Black-Green (Golgari) Value: This archetype focuses on recursion effects, allowing players to bring back creatures from the graveyard.

2. Prioritize Powerful Cards

During the draft, it's vital to prioritize powerful cards, especially those that can define your deck. Some examples of impactful cards from Modern Horizons 2 include:

- Murktide Regent: A powerful flying creature that can be hard to deal with.
- Grief: An impactful creature that can disrupt your opponent's hand.
- Solitude: A creature with a powerful enter-the-battlefield effect that can remove threats from the board.

When evaluating cards, consider their potential impact on the game, as well as how they fit into your chosen archetype.

3. Pay Attention to Color Balance

Maintaining a balanced mana curve is crucial in Modern Horizons 2 drafts. Strive for a mix of early game plays and late-game finishers. A typical mana curve might include:

- 1-2 drops: 10-12 cards
- 3-4 drops: 6-8 cards
- 5+ drops: 4-6 cards

Additionally, be mindful of your color commitments. Sticking to two or three colors can enhance your chances of consistently casting your spells.

4. Adapt to the Draft Environment

Drafting involves not only selecting cards for your deck but also understanding the cards being drafted by others. Pay attention to the signals from neighboring players. If you notice that a color is being heavily drafted by your left neighbor, it may be beneficial to shift your color choices.

- Drafting Signals: Look for cards being passed to you that suggest a specific archetype is open.
- Cutting Colors: If you are in a color that others are not drafting, you can take advantage of that by selecting powerful cards from that color.

Card Evaluation

Evaluating cards is a critical skill in drafting. Here are some tips for assessing cards effectively:

1. Assess Card Synergy

Understanding how cards work together can enhance your deck's overall performance. Look for cards that complement one another, such as:

- Creatures that benefit from spells: Cards that synergize with instants or sorceries can create powerful combinations.
- Life gain and payoffs: In the lifegain archetype, look for cards that gain life and others that have bonuses for doing so.

2. Consider Flexibility

Cards with multiple uses or those that can fit into different strategies can be incredibly valuable:

- Dual-Faced Cards: Cards that can transform into a different type can adapt to various situations.
- Versatile Removal: Spells that can deal with a variety of threats are often better than narrow removal options.

3. Evaluate the Meta

Understanding the current metagame can also inform your card evaluation. If aggressive strategies are prevalent, prioritize cards that can stabilize the game, such as:

- Efficient Removal: Cards that can deal with opposing threats effectively.
- High-Toughness Creatures: Creatures that can withstand damage from common attackers in the format.

Final Preparation for the Draft

As you prepare for a Modern Horizons 2 draft, consider the following steps to help streamline your experience:

1. **Practice Card Evaluation:** Familiarize yourself with the set by reviewing top cards and their interactions.
2. **Mock Drafts:** Participate in or simulate draft scenarios to hone your skills.
