Setting Up the Orbit Easy Dial Timer

Setting up your Orbit Easy Dial timer is a straightforward process. Follow these steps to get started:

Step 1: Gather Your Supplies

Before you begin, ensure you have the following materials:

- Orbit Easy Dial Timer
- Garden hose or irrigation system
- Water source (such as a faucet)
- Battery (if required)

Step 2: Install the Timer

1. **Attach the Timer:** Connect the Orbit Easy Dial to your water source. This is usually done by attaching it to a standard outdoor faucet.
2. **Connect Your Hose:** Attach your garden hose or irrigation system to the other end of the timer.
3. **Insert Batteries:** If applicable, insert the required batteries to ensure your settings are saved during power outages.

Step 3: Program Your Timer

Programming your timer is where the magic happens. Here's how to do it:

1. **Turn the Dial:** Rotate the dial to the "Set Time" option.
2. **Set the Current Time:** Use the "+" and "-" buttons to adjust the current time. Press "OK" to confirm.
3. **Select the Watering Days:** Choose which days you want to water by turning the dial to the "Water Days" setting.
4. **Adjust Start Times:** Set the start time for watering by navigating to the "Start Time" option.
5. **Set Watering Duration:** Determine how long each zone will be watered by selecting "Watering Duration."
6. **Save Your Settings:** Once you're satisfied, make sure to save your settings by turning the dial to the "Run" position.

Advanced Features of the Orbit Easy Dial Timer

The Orbit Easy Dial timer comes with several advanced features that can enhance your irrigation system's efficiency.

Rain Delay Function

One of the standout features is the rain delay function. This allows you to

pause your watering schedule during wet weather. To activate this feature:

1. Turn the dial to the "Rain Delay" option.
2. Use the "+" and "-" buttons to select how many days you want to delay watering.
