The problem-solution pattern is particularly effective for speeches addressing social or political issues. This structure begins by outlining a specific problem, followed by a proposed solution.

- Step 1: Identify the Problem

Clearly articulate the issue at hand. Use statistics, anecdotes, and expert opinions to illustrate the severity of the problem.

- Step 2: Explain the Solution

Present your proposed solution in detail. Explain how it addresses the problem and what steps need to be taken to implement it.

- Step 3: Provide Support

Offer evidence that supports the effectiveness of your solution. This may include case studies, testimonials, or data from credible sources.

- Step 4: Call to Action

End with a strong call to action, urging your audience to take specific steps to support your solution.

2. Monroe's Motivated Sequence

Developed by Alan H. Monroe, this pattern is designed to inspire immediate action from the audience. It consists of five steps:

- Step 1: Attention

Capture the audience's attention with a compelling story, question, or statistic.

- Step 2: Need

Establish the need for change by highlighting the problem and its impact on the audience or society.

- Step 3: Satisfaction

Present your solution and demonstrate how it effectively addresses the need.

- Step 4: Visualization

Help the audience visualize the benefits of adopting your solution. Use vivid imagery to illustrate the positive outcomes.

- Step 5: Action

Conclude with a clear call to action, motivating the audience to take the steps you recommend.

3. Comparative Advantages Pattern

This pattern is used when comparing multiple solutions or approaches to a problem. It emphasizes the advantages of the proposed solution over alternatives.

- Step 1: Present the Alternatives

Introduce the various options available for addressing the problem.

- Step 2: Analyze Each Option

Discuss the pros and cons of each alternative. Use factual evidence to

support your analysis.

- Step 3: Highlight Your Solution

Clearly outline why your proposed solution is superior to the others. Focus on the benefits and unique aspects.

- Step 4: Call to Action

Encourage the audience to support your solution over the alternatives presented.

4. Sequential Pattern

The sequential pattern organizes the speech in a step-by-step format, making it ideal for persuasive speeches that require a logical progression of ideas.

- Step 1: Introduction

Introduce the topic and state your thesis.

- Step 2: Outline the Steps

Provide a clear outline of the steps or processes involved in your argument.

- Step 3: Detail Each Step

Elaborate on each step, providing examples, anecdotes, and supporting evidence.

- Step 4: Recap and Call to Action

Summarize the key points and end with a compelling call to action.
