Step 1: Prepare Your Workspace

Choose a clean, flat surface where you can work comfortably. Make sure you have adequate lighting, as some pieces may be small and require precision.

Step 2: Sort the Puzzle Pieces

Before diving into assembly, take a moment to sort the pieces. This can save you time and frustration later on. Group the pieces by shape and size:

Step 3: Start with the Base

Begin assembling the puzzle by constructing the base. This is the foundation of your carriage and will require strong support for the rest of the pieces. Identify the base pieces and fit them together, ensuring they lock in place securely.

Step 4: Assemble the Side Walls

Once the base is complete, move on to the side wall pieces. These pieces are typically larger and will give your carriage its shape. Follow the contours and snap the pieces together, ensuring they are aligned correctly.
