3. Turn on the device using the power button.

Operating the Dynatron 709

Once your Dynatron 709 is set up, it's time to explore its operational capabilities. This section will guide you through the basic functions and settings.

Choosing a Treatment Modality

The Solaris Series Dynatron 709 offers several treatment modalities. Here's how to select the one that suits your needs:

1. Ultrasound Therapy:
 - Ideal for deep tissue treatment.
 - Use it for conditions like tendinitis or muscle strains.
2. Electrical Stimulation:
 - Effective for muscle re-education and pain relief.
 - Select this option for neuromuscular issues or post-surgical recovery.
3. Infrared Therapy:
 - Best for superficial tissues and promoting blood circulation.
 - Recommended for arthritis and chronic pain conditions.

Setting Treatment Parameters

After selecting a modality, adjust the following parameters as needed:

- Intensity: Set the appropriate level based on patient tolerance.
- Duration: Choose the length of the treatment session, typically ranging from 5 to 30 minutes.
- Frequency: Adjust the frequency based on treatment goals and patient needs.

Conducting a Treatment Session

1. Ensure the patient is comfortable and in a relaxed position.
2. Apply the appropriate gel or conductive medium to the treatment area if required.
3. Position the applicator directly over the treatment site.
4. Start the session and monitor the patient's feedback throughout.

Maintenance of the Dynatron 709

Regular maintenance is crucial to ensure the longevity and effectiveness of your Solaris Series Dynatron 709. Follow these guidelines:

Cleaning the Device

- Wipe down the exterior of the unit with a soft, damp cloth after each use.
- Avoid using harsh chemicals or abrasive materials that could damage the surface.

Inspecting Components
