Cleaning and Maintenance

Regular cleaning and maintenance of the Pax Mini are essential to ensure device longevity and performance. Residue buildup can affect flavor and vapor quality, so routine care is recommended.

Cleaning the Heating Chamber

After each use, allow the device to cool before cleaning. Use a small brush to remove loose debris from the heating chamber. For deeper cleaning, the chamber can be wiped with isopropyl alcohol and a cotton swab to dissolve residue. Ensure the chamber is completely dry before use.

Maintaining the Mouthpiece

The mouthpiece should be cleaned regularly to prevent residue buildup and maintain hygiene. Detach the mouthpiece and soak it in warm soapy water, then rinse thoroughly. Dry it completely before reattaching to the device.
