Question 1: What is the difference between exempt and non-exempt employees?

Question 3: If an employee earns a gross pay of \$3,000 and has total deductions of \$600, what is their net pay?

Answer: To calculate net pay, subtract total deductions from gross pay:

Net Pay = Gross Pay - Deductions

Net Pay = \$3,000 - \$600 = \$2,400

Question 4: How do you calculate overtime pay?

Answer: Overtime pay is calculated by taking the employee's regular hourly rate and multiplying it by 1.5 (the overtime rate) for each hour worked over 40 hours in a week. For example, if an employee earns \$20 per hour and works 45 hours, their overtime pay would be calculated as follows:

Regular pay for 40 hours = 40 hours x \$20 = \$800

Overtime pay for 5 hours = 5 hours x (\$20 x 1.5) = \$150

Total Pay = Regular Pay + Overtime Pay = \$800 + \$150 = \$950
