Navigating the Polaris Sportsman 700 Parts Diagram

When examining a parts diagram for the Polaris Sportsman 700, it is essential to understand its layout and terminology. Here are some components typically included in the diagram:

1. Electrical System

- Battery: Provides power to the ATV's electrical components.
- Starter Motor: Responsible for starting the engine.
- Ignition Coil: Converts battery voltage to a higher voltage for the spark plugs.

2. Engine Components

- Cylinder Head: Houses the valves and provides combustion chamber.
- Piston: Moves up and down within the cylinder, creating power.
- Crankshaft: Converts linear motion from the piston into rotational motion.

3. Transmission and Drivetrain

- Gearbox: Transmits power from the engine to the wheels.
- Drive Belt: Transfers power to the rear wheels.
- Differential: Allows the left and right wheels to turn at different speeds.

4. Suspension and Steering

- Front and Rear Shocks: Absorb shocks and bumps for a smoother ride.
- Steering Column: Connects the handlebars to the front wheels.
- A-Arms: Control the wheel's movement and provide suspension travel.

5. Body Components

- Fenders: Protect the vehicle and rider from debris.
- Footrests: Provide a stable platform for the rider's feet.
- Seat: The area where the rider sits, often cushioned for comfort.

Common Issues and Troubleshooting Tips

Even with proper maintenance, the Polaris Sportsman 700 may encounter some common issues. Here are a few problems and how to troubleshoot them:

1. Starting Issues

- Check the Battery: Ensure that the battery is charged and properly connected.
- Inspect the Starter: Listen for any clicking sounds when trying to start; this may indicate a faulty starter motor.

2. Poor Performance

- Fuel System: Inspect fuel filters and lines for clogs or leaks.
- Air Filter: A dirty air filter can restrict airflow, affecting performance.

3. Overheating

- Cooling System: Check coolant levels and inspect for leaks in hoses.
- Radiator: Ensure that the radiator is clean and free from debris.

Maintenance Tips for the Polaris Sportsman 700

Regular maintenance is crucial for keeping your Polaris Sportsman 700 in optimal condition. Here are some maintenance tips to consider:

- **Regular Oil Changes:** Change the engine oil every 50 hours of operation or at least once a year.

- **Inspect and Replace Filters:** Check air and fuel filters regularly, replacing them as needed.
- **Check Tire Pressure:** Maintain proper tire pressure for better traction and handling.
- **Inspect Brake System:** Regularly check brake pads and fluid levels to ensure safe operation.
- **Grease Moving Parts:** Lubricate bearings and joints to prevent wear and tear.
