Understanding Prefixes and Suffixes

What are Prefixes?

Prefixes are groups of letters added to the beginning of a root word to change its meaning. For example, the prefix "un-" means "not," so when added to the word "happy," it creates the word "unhappy," which means "not happy."

What are Suffixes?

Suffixes are letters added to the end of a root word that also alters its meaning, often changing the word's part of speech. For instance, adding the suffix "-ful" to "care" forms "careful," which changes the meaning to "full of care."
