Understanding Proper Nouns and Common Nouns

Proper nouns and common nouns are fundamental categories of nouns in the English language that every student must understand. A proper noun refers to a specific name of a person, place, or organization and is always capitalized. Examples include "New York," "Sarah," and "Microsoft." In contrast, a common noun denotes a general item, person, or place and is not capitalized unless it starts a sentence. Examples include "city," "girl," and "company."

Definition and Characteristics of Proper Nouns

Proper nouns are unique identifiers for particular entities. They distinguish one specific person, place, or thing from others in the same category. Proper nouns always begin with a capital letter, regardless of their position in a sentence. These include names of people, geographic locations, institutions, brands, and titles.

Definition and Characteristics of Common Nouns

Common nouns are general names for a class of objects or concepts. They do not require capitalization unless they are at the beginning of a sentence or part of a title. Common nouns include words such as "dog," "city," "teacher," and "book." They represent categories rather than specific individual entities.
