Getting Started with Your Ptahdus Heated Jacket

To ensure a smooth experience with your Ptahdus heated jacket, follow these initial setup instructions.

Unboxing and Initial Inspection

1. **Open the Package:** Carefully open the package and remove the jacket.
2. **Inspect for Damage:** Check for any visible damage or missing components, such as the battery or charger.
3. **Read the Manual:** Familiarize yourself with the user manual provided, as it contains vital information specific to your model.

Charging the Battery

Before using your heated jacket, it is essential to charge the battery fully:

1. **Locate the Battery Compartment:** This is usually found inside a pocket of the jacket.
2. **Connect the Battery:** Follow the instructions to connect the battery to the power input.
3. **Plug in the Charger:** Use the supplied charger and plug it into a power outlet.
4. **Charge Indicator:** Wait for the charge indicator light to signal full charge (usually represented by a green light). Charging times may vary, typically between 3 to 5 hours.

Operating Your Ptahdus Heated Jacket

Once your battery is fully charged, it's time to use your heated jacket.

Powering On

1. Locate the Power Button: The power button is often on the inside of the jacket or outside on the chest area.
2. Press the Button: A short press will turn the jacket on, usually indicated by a light turning on.

Adjusting Temperature Settings

Most Ptahdus heated jackets come with multiple heat settings. Here's how to adjust them:

1. Single Press: Press the power button to cycle through the temperature settings. The typical settings are:
 - High (red light)
 - Medium (white light)
 - Low (blue light)
2. Choose Your Setting: Select the temperature that best suits your environment.

Wearing and Comfort

- Layering: The heated jacket is designed to be worn over a base layer for optimal comfort. Avoid wearing bulky clothing underneath.
- Adjust Fit: Ensure that the jacket fits well, allowing for freedom of movement while keeping the heat close to your body.

Maintenance of Your Ptahdus Heated Jacket

To prolong the life of your heated jacket, follow these maintenance tips:

Cleaning Instructions

1. Disconnect the Battery: Always remove the battery before washing.
2. Hand Wash Only: Use lukewarm water and mild detergent. Avoid using bleach or fabric softeners.
3. Air Dry: Do not use a dryer. Hang the jacket to air dry completely.

Storage Tips

- Battery Removal: Always remove the battery before storing the jacket.
- Cool, Dry Place: Store the jacket in a cool, dry area away from direct sunlight.
- Avoid Compression: Do not compress the jacket when storing, as this may damage the heating elements.

Safety Precautions

While using your Ptahdus heated jacket, consider the following safety tips:

- Avoid Water: Although the jacket may be water-resistant, avoid submerging it in water or exposing it to heavy rain for extended periods.
- Monitor Battery Levels: Regularly check the battery level to avoid unexpected shutdowns when in use.
- Inspect for Damage: Before each use, inspect the jacket for any signs of damage to the heating

elements or fabric.

- Follow Manufacturer Guidelines: Always adhere to the instructions provided by Ptahdus in the user manual for safe and effective use.

Troubleshooting Common Issues

If you encounter problems with your heated jacket, here are some common issues and solutions:

Jacket Not Heating

1. Check Battery Connection: Ensure the battery is properly connected.
2. Charge the Battery: If the jacket does not turn on, the battery may need recharging.
3. Inspect for Damage: Look for any visible damage to the heating elements.

Battery Not Charging

1. Check Charger Connection: Ensure that the charger is properly plugged in and functioning.
2. Inspect Charger and Battery: Look for damage. If the charger is faulty, consider replacing it.

Temperature Settings Not Changing

1. Power Cycle the Jacket: Turn the jacket off and on again.
2. Inspect the Power Button: Ensure the button is not stuck or damaged.
