Understanding the Low FODMAP Diet

Before diving into the recipes, it's essential to understand what FODMAPs are and why they can cause digestive issues. FODMAP stands for Fermentable Oligosaccharides, Disaccharides, Monosaccharides, and Polyols. These are types of carbohydrates that can be poorly absorbed in the small intestine, leading to bloating, gas, and abdominal pain in sensitive individuals.

The low FODMAP diet typically involves three phases:

1. **Elimination Phase:** Remove all high FODMAP foods from your diet for 4-6 weeks.
2. **Reintroduction Phase:** Gradually reintroduce high FODMAP foods one at a time to identify which ones trigger symptoms.
3. **Personalization Phase:** Create a long-term eating plan that includes low FODMAP foods and any tolerated high FODMAP foods.
