Maintaining Your Roomba i4 Evo

Regular maintenance is crucial for keeping your Roomba i4 Evo in optimal working condition. Here are some essential maintenance tips:

1. Cleaning the Brushes

- Remove the dual multi-surface rubber brushes periodically.
- Clean any hair or debris that may have accumulated around the brushes.

2. Emptying the Dust Bin

- Regularly check the dust bin and empty it after each cleaning session or when it is full.
- To empty, press the bin release button and pull out the dust bin. Dispose of the contents and replace it securely.

3. Replacing Filters

- The high-efficiency filter should be replaced every 2 to 3 months for optimal performance.
- To replace, remove the dust bin and locate the filter. Replace it with a new one and secure it back in place.

4. Checking Sensors and Wheels

- Inspect the cliff detection sensors for dust or debris and gently clean them if necessary.
- Ensure that the wheels are free of obstructions and can move smoothly.

Troubleshooting Common Issues

While the Roomba i4 Evo is designed for reliability, you may encounter some issues. Here are common problems and their solutions:

1. Roomba Doesn't Start
