Setting Up the RK100

Setting up your Royal Kludge RK100 is straightforward. Follow these steps for both wired and wireless configurations.

Wired Setup

1. Connect the Keyboard: Plug the USB Type-C cable into the keyboard and the other end into your computer.
2. Driver Installation: Most operating systems will automatically recognize the keyboard. If needed, download drivers from the official Royal Kludge website.
3. Testing: Ensure all keys are functioning properly by testing them in a text editor.

Wireless Setup

1. Power On: Turn on the keyboard using the switch located on the bottom.
2. Activate Bluetooth Mode: Press the function key (Fn) and the Bluetooth key (usually F1, F2, or F3) simultaneously to enter pairing mode.
3. Connect via Device: On your computer or device, search for Bluetooth devices and select the RK100 to connect.
4. Testing: After connecting, test all keys to ensure proper functionality.

Customizing the RK100

One of the standout features of the RK100 is its customization options. This section will guide you through various ways to personalize your keyboard.

Key Remapping

Key remapping allows you to change the function of specific keys. Here's how to do it:

1. Download Software: Visit the Royal Kludge website to download the keyboard customization software.
2. Install the Software: Follow the on-screen instructions to install the software on your computer.
3. Select Key: Open the software and select the key you wish to remap.
4. Assign New Function: Choose the new function or macro you want to assign to that key.
5. Save Changes: Save your settings to apply the changes.

Customizing RGB Lighting

The RK100's RGB lighting can be customized through the software or directly on the keyboard.

1. Using Software:
 - Open the customization software.

- Navigate to the lighting section.
- Choose from pre-set effects or create your own.
- Save your settings.

2. Using Keyboard Shortcuts:

- To change lighting effects, press the Fn key along with the specific function key designated for lighting.
- Cycle through effects until you find one you like.

Maintaining Your RK100

Proper maintenance will ensure your RK100 remains in good condition and performs optimally. Here are some maintenance tips:

Cleaning the Keyboard

1. Unplug the Keyboard: Always disconnect the keyboard before cleaning.
2. Remove Keycaps: Use the keycap puller to gently remove the keycaps.
3. Clean the Surface: Use a soft cloth and mild cleaning solution to wipe down the keyboard surface.
4. Clean Keycaps: Soak keycaps in warm, soapy water. Rinse and dry thoroughly before reattaching.
5. Reattach Keycaps: Once everything is dry, carefully snap the keycaps back into place.

Updating Firmware

1. Check for Updates: Regularly check the Royal Kludge website for firmware updates.
2. Download Update: Follow the instructions provided on the website to download the latest firmware.
3. Install Update: Use the firmware update tool to install the latest version.

Troubleshooting Common Issues

Even with high-quality products like the RK100, users may encounter issues. Here are some common problems and their solutions:

Keyboard Not Detected

- Check Connections: Ensure the keyboard is properly plugged in or connected via Bluetooth.
